

MEDIT *i700*

Unleash Your Clinic's Potential

Scanning Reimagined

Medit has been at the forefront of realizing the easy entry into digital dentistry. your patient's experience will be improved with our innovation.

How can we develop the product beyond the imagination of users?
How should we incorporate our advanced scanning technology and 20 years of engineering know-how?

We believe that digital dentistry unleash your clinic's potential. Imagine how digital dentistry can change the life of you, your patients, and your lab partners. To realize this, Medit never stops evolving scanning systems with continuous product upgrades.

Medit reimagines the scanning.

First Look at the **Medit i700**

The **Medit i700** makes the scanning experience a comfortable one for both dentist and patient.
With the **powerful hardware** and **intelligent software**, the Medit i700 is the key to **unleash your clinic's full potential**.

Medit Plug & Scan

Unlike the most scanners in the market, Medit i700 can be [directly connected to the PC using power delivery cable](#) without power hub and extra cables. This new feature of Medit i700 improves the mobility and the maintenance.

Minimum System Requirement:
USB Type-C / USB Power Delivery
5V, 3A Power delivery support

Medit Link

Medit Link is a **fully open system** for you.

Dashboard

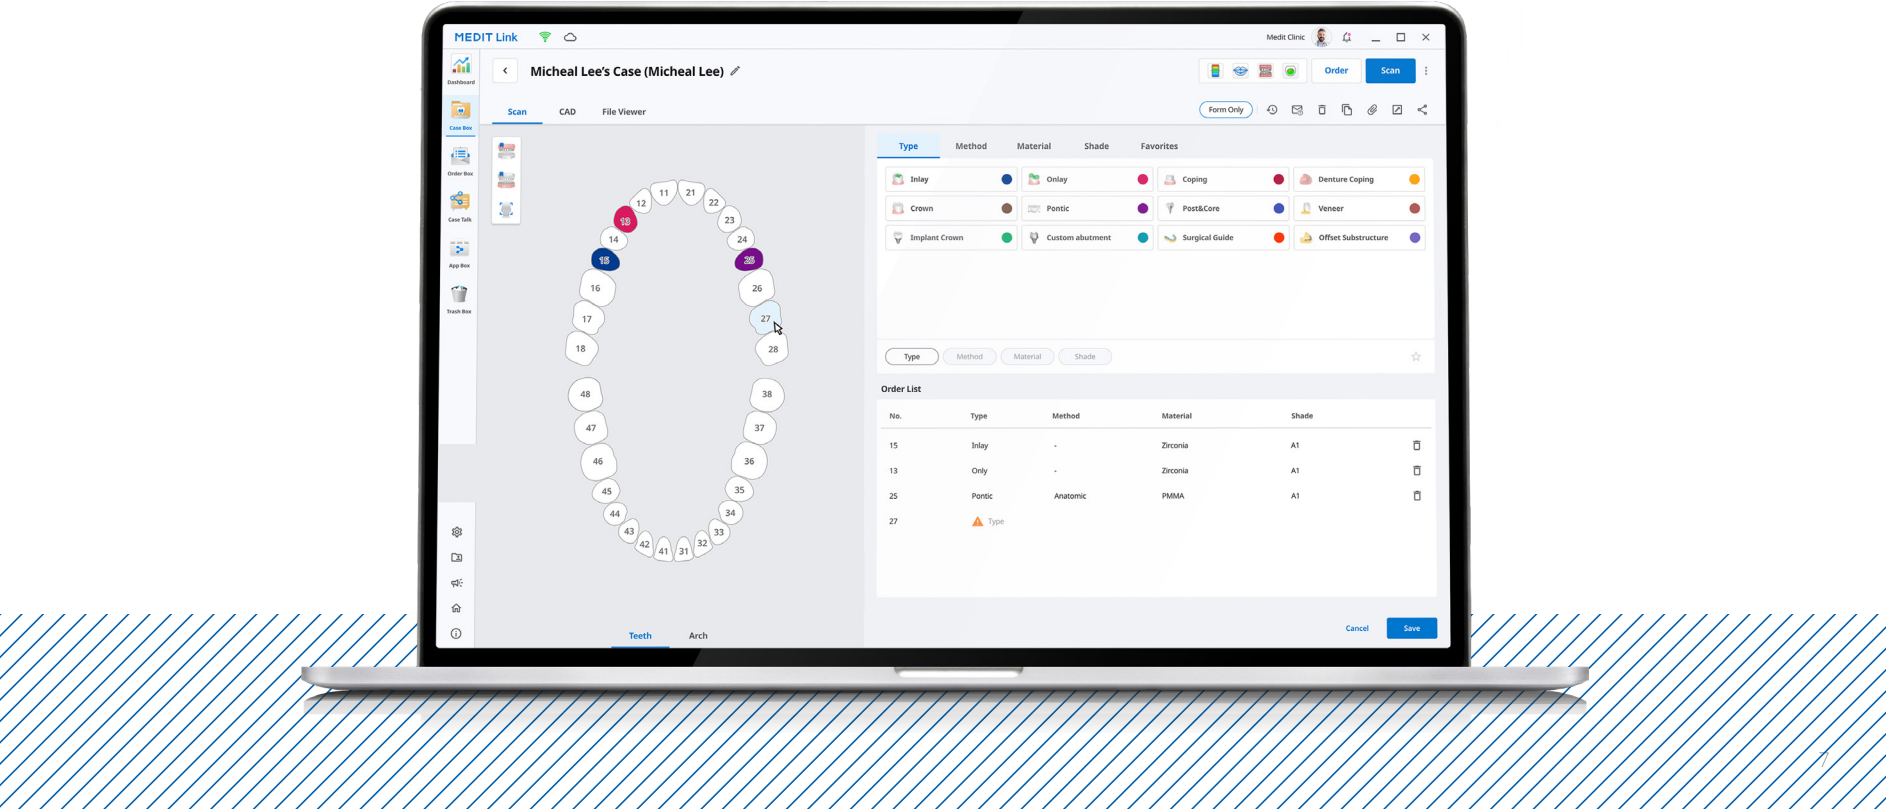

Workflow Management

Cloud Service

Patients Communication

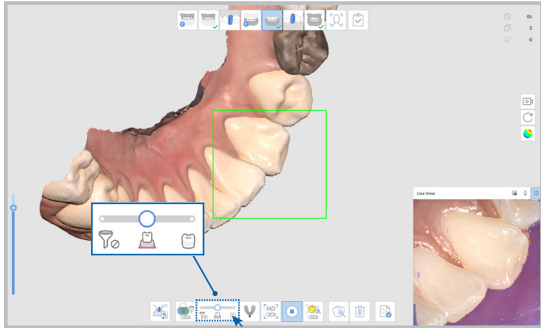

Scan with [intelligent features](#) and [apps specialized](#) for your dental procedures.
Improve consultation experience with your patient to [provide better treatment options](#).
Enhance your communication with labs through a [real time cloud-based system](#).

Medit is one of the fastest companies to [provide software upgrades](#).
Users can get the renewed scanner with improved performance and new features through software upgrades.

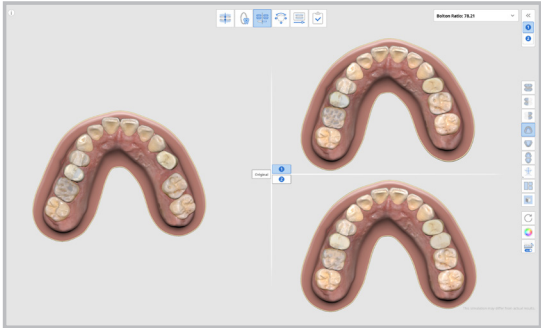

Scan & Communicate

Smart Filtering

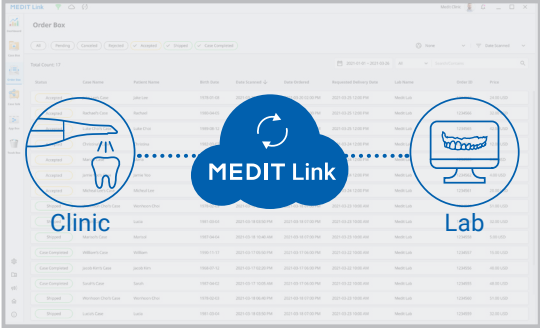

Remove unnecessary soft tissue data which is one of the biggest challenges when performing scans.

Medit Ortho Simulation

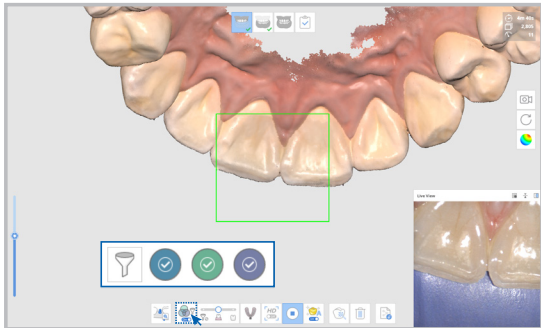

Help the patient visualize potential results of an orthodontic treatment.

Cloud-based Service

Store all data in the cloud. Work on your original scans, archive your digital impressions and orders, manage your cases wherever you are.

Smart Color Filtering

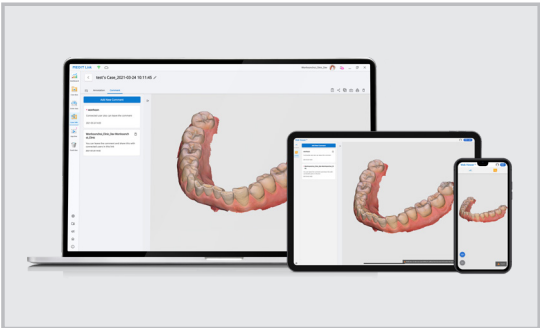

Automatically filter the color out during scanning, reducing the number of artifacts and making retraction easier.

Medit Smile Design

Show the patient their future smile or help them envision a braces treatment.

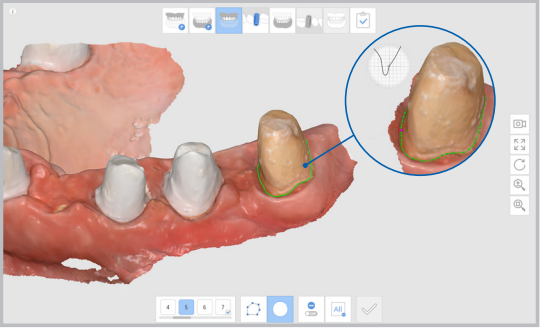

Web Viewer & Case Talk

Experience smoother communication, with partners. View scan data on any device and share notes. All data is stored securely.

Treatment Types

Margin line Creation

Choose between allowing the system to automatically generate the margin line for any tooth or create it manually.

Denture Scanning

Scan edentulous patients, or the inner surface of the denture. Use wax rims or dentures to perform occlusal alignment.

A.I. Scanbody & Abutment matchig

Abutments and scan bodies are automatically matched and aligned with the scan data. Use this function for downstream work such as CAD.

Medit Crown Fit

Conduct a modelless crown fitting. The software can reveal where alterations may be needed.

Impression Scanning

Get the data from the hard-to-scan areas using an impression, scan it, and combine with the intraoral data.

Face Scan

Scan your patient's face, import 3D face data and bone data, and align all these data sets to get a more comprehensive final result.

Dr. Marko Tadros
Prosthodontist

The *i700* is a technological showcase in every aspect. Medit has done it again by providing an even faster, more accurate scanner for daily clinical practice.

Dr. Vas Srinivasan
Orthodontist

We were lucky to start using Medit when they were new to the orthodontic and clear aligner market. The Medit scanners since then, first the *i500* and now the *i700*, and the team behind them, have changed the way we provide dental care to our patients.

Dr. Mark T. Murphy
General Dentist

The *i700* has truly exceeded all my expectations and simplified my Sleep practice. It's fast, light, and small, yet it captures a large scan area. The reversible tip, remote control button, and built-in UV disinfection capability were fantastic surprises too.

Dr. Michael Scherer
Prosthodontist

The new Medit *i700* easily and predictably integrated into every part of my digital dentistry focused office and laboratory. From scanning to design, to printing and milling, Medit has figured out how to make it all work!

Prof. Katalin Nagy
OMS, Prosthodontist

I am grateful for Medit's unceasing desire to improve the standard of care in digital dentistry. The creation of a virtual model using 3D data has proven invaluable to both my students and patients when it comes to every aspect of care including diagnosis, planning, and treatment acceptance.

Dr. Isaac Tawil
General Dentist

The *i700* has become my go-to scanner. I have been astounded by the speed and quality. The angulated mirror has made capturing the inter-proximal contacts significantly easier. Another major innovation from the company quickly establishing itself at the top of the intraoral scanning field.

Hear **what our users say** about their experience

Use Medit i700 scan data for a **wide range of applications**

Your Medit Link open system enables you to use your scan data for all kinds of workflows, with any software that allows the import of STL, PLY and OBJ files. This means that you can use our scan data for:

**Clear aligners | Crown and bridges | Implant-supported restorations | Full and partial dentures
Orthodontics | Implant surgical guides | Sleep apnea devices | Dental models | 3D printing...**

...and more!

Enjoy working with a **variety of partners** on different projects!

Our Medit Community

Our users have always been at the heart of all that we do, and we're proud to have built a community that not only gives us constant feedback and suggestions but also actively supports and helps one another. For our efforts in community-building, we received the Best Community Support award at the iDD Intraoral Scanner Awards 2020.

But we didn't just build a community. We also built a resource library for you to learn on the go. You can check out video tutorials on our Medit Academy YouTube channel or read help articles in our Help Center.

Beyond the training and support from our distribution partners, you can also reach out to our dedicated tech support team if you have any questions or encounter any issues.

This means that you never need to worry about being alone in your scanning journey.

So what are you still waiting for?

Join the digital dentistry revolution and enjoy the Medit experience.>>

Specifications

Category		Medit i700
Scanning technology	Scanning frame	Up to 70 FPS
	Imaging technology	3D-in-motion video technology 3D full color streaming capture
	Light source	LED
	Anti-fogging technology	Adaptive anti-fogging
Accuracy	Full-arch	10.9µm ± 0.98
Handpiece	Dimensions	248 x 44 x 47.4 mm
	Weight	245 g
Tip	Tip size	22.2 x 15.9 mm
	Mirror angle	45-degree angle <i>Easier to scan distal molar area</i>
	Scan area	15 x 13 mm
	Autoclavable	Up to 100 times Autoclave 121°C 30 mins Autoclave 134°C 4 mins
	Reversible Tip	Yes
Special mode	Remote control mode	Yes
	UV-C disinfection	Yes
Cable	Length	2.0 m / Handpiece Detachable
	Connectivity	USB 3.1 Gen1 (C Power Delivery)

Recommended System Requirements

Category	Laptop Recommended	Desktop Recommended
CPU	Intel Core i9 - 10980HK	Intel Core i9 - 10900K
	AMD Ryzen 9 4900H/5900H	AMD Ryzen 9 5900X
RAM	32 GB	
Graphic	Nvidia GeForce RTX	
	2070/2080/3070/3080/3090	
	Above 8GB	
	(Not supporting Radeon)	
OS	Window 10 Pro 64-bit

Scanning Reimagined, MEDIT

Through innovation and customer care, we drive the digital dentistry revolution. We believe that through addition of advanced scanning technology to digital dentistry we are giving dentists the tools they need to provide better care to their patients. As the scanning company most trusted by consumers, we work hard to create new, previously unimagined possibilities for scanning through better innovation and customer care.
